

A scenic view of the Berkeley campus at sunset. The sun is low on the horizon, casting a warm glow over the city. In the background, the Sather Tower (Cathedral of Learning) is visible, along with other campus buildings and the surrounding hills. The foreground is filled with trees and foliage, some of which are silhouetted against the bright sky.

Berkeley Research Computing Town Hall Meeting Sept. 24

Patrick Schmitz

Assoc. Director, Research IT
BRC Program Director

Krishna Muriki, LBNL/BRC User Services

Aaron Culich, Research IT Service Architect
Chris Hoffman, Research IT RDM Program

Research IT: Mission

Research IT provides research information technologies, consulting, and community for the Berkeley campus. Our goal: Advance research by providing faculty and students the best IT services possible.

Research IT: Services

Current Programs:

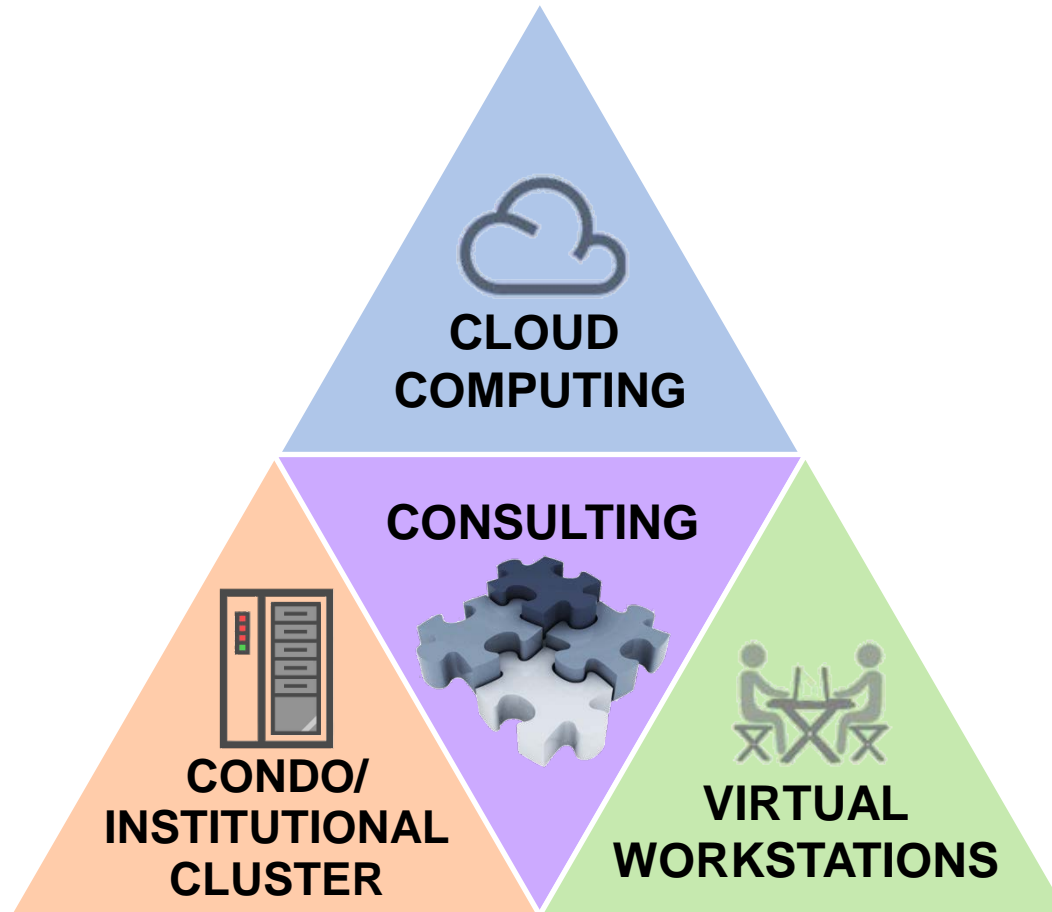

- Berkeley Research Computing
- Research Data Management
- Digital Humanities
- Museum Informatics

Research IT: Future

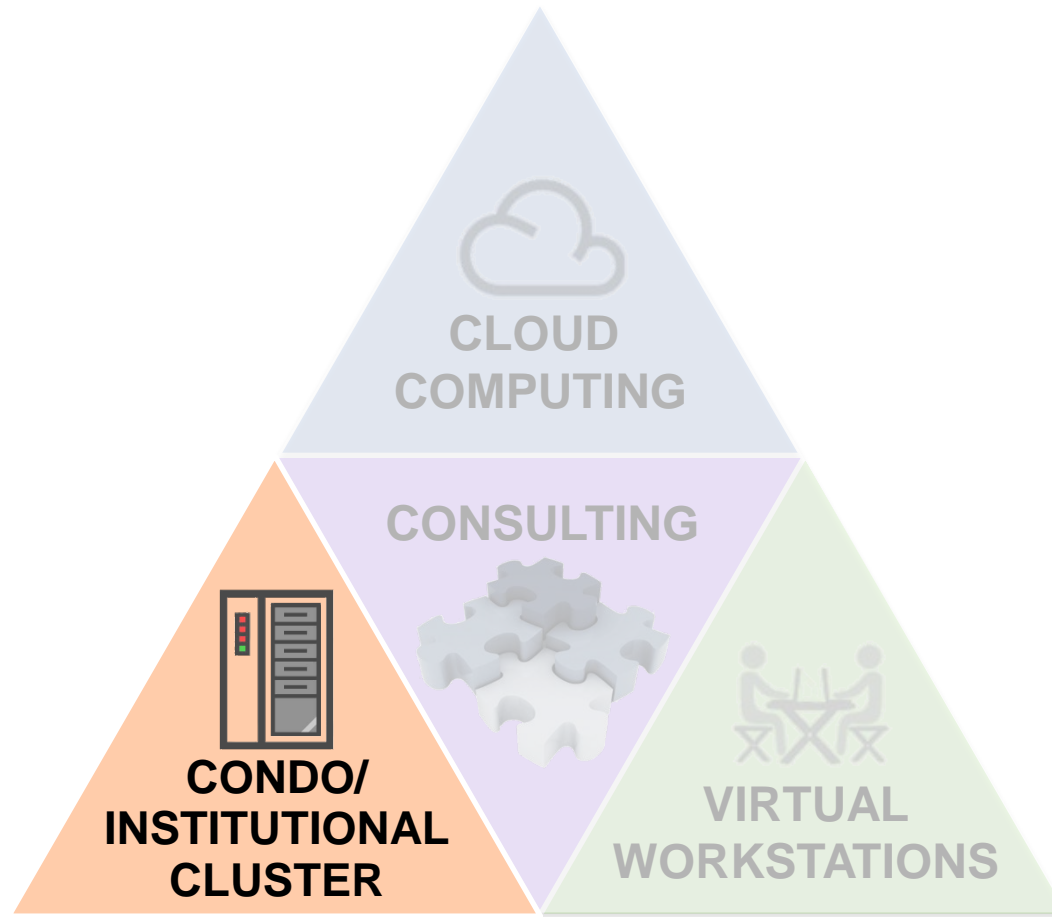

Reviewing now for Future:

- Data Analysis: Quantitative and Qualitative Tools
- Data Visualization and GIS
- Web Publishing and Collaboration
- Software Licensing and Distribution
- Research Application Development Support
